Welcome to the seventh annual Age Well Conference! Today’s event was planned and organized by a team of Boulder County Area Agency on Aging staff and generous professional volunteers representing local companies and organizations serving Colorado’s Front Range. We hope this conference is a unique opportunity for you to broaden and add depth to your understanding of aging, expand your network, and realize the growing scale and importance of our regional network of advocates, researchers, innovators, and practitioners.

It is no surprise that many of our communities are aging. By 2040, over a quarter of Boulder County’s population will be over the age of 60. During this same time period, the population of older adults in Boulder County over the age of 80 is projected to increase by 250%. This rapid growth is presenting new challenges and opportunities across society – in how we get around, in what we buy, in how we plan for the future, and in how we manage growing older. The better we can understand how to prepare and meet the increasing needs of older adults and those caring for and offering solutions to older adults, the better off we will all be.

To anticipate and respond to this unprecedented population growth and societal shift, the Boulder County Area Agency on Aging (BCAAA), in partnership with many community stakeholders, created a data- and insights-driven strategic plan in 2006 – now called the Boulder County Age Well Strategic Plan. The plan is updated every four years, and reflects data gathered through months of community meetings, public input sessions, public and key informant surveys, and other primary and secondary sources. It is an invitation and call to action for policy makers, planners, funders, service providers, faith communities, community organizations, local businesses, and the people who call Boulder County home, to work together to make our community as age-friendly as possible.

BCAAA is now in the process of updating the Age Well Strategic Plan. With insights and support from people like you, we can achieve more age-friendly communities – here in Boulder County, across Colorado, and beyond. To stay informed of our Age Well strategic work, please become familiar with www.AllAgeWell.com.

Thank you, and welcome to the 2018 Age Well Conference!

Marisa Gerstein Pineau, PhD

Marisa is Researcher and Senior Associate with FrameWorks Institute, bridging research, research interpretation and applications units. A sociologist by training, Marisa has focused her research on gender and family, medicine, culture, and public policy. Prior to joining FrameWorks, she served as a program officer with the National Academies of Sciences, Engineering, and Medicine, where she worked with panels of leading experts on a variety of topics. Marisa received her BA in sociology from New College of Florida and her MA and PhD in sociology from the University of California, Los Angeles.

Karen Brown’s interest in aging – and its challenges and opportunities – started more than ten years ago as a result of caregiving for her aging parents and relatives. Within the last six years, she has focused on being a catalyst for gerontechnology, which blends gerontology with technology and innovation to improve the lives of older adults, their families, and caregivers. She works with and/or serves on the boards of a variety of aging-related organizations, including Aging 2.0 Denver, the Strategic Action Planning Group on Aging (SAPGA), the Colorado Gerontological Society, and Seniors Matter.

Wade Buchanan is the Senior Advisor on Aging in the office of Colorado Governor John Hickenlooper. This is a new position in state government and is designed to help the state plan and coordinate a wide range of programs and issues affecting aging and older Coloradans. Wade has over 30 years of experience in state government, public policy and non-profit leadership. He spent 15 years as the founding President and CEO of the Bell Policy Center. Before that he held a variety of positions in the administration of former-Governor Roy Romer, including policy director, chief speech writer, Director of the State Energy Office and Acting Executive Director of the Colorado Department of Natural Resources. Wade is a fourth-generation Coloradan, a graduate of Colorado College, and holds a master’s degree from Oxford University in England.
**Tim Enwall** is the Head of Misty Robotics, Inc. Based in Boulder, Misty is “building the robot for everyone.” Misty Robotics’ vision is to put a personal robot in every home and office. According to Tim and his team, “these robots will be seen and treated as our friends, our teammates, and a part of our families – performing helpful tasks, providing safety, and interacting with humans in entertaining and friendly ways. Tim’s experience includes being an operating executive of Solista, a 50-person, $5M company; Tendril, a 200-person, $20M company; and Revolv, a 30-person venture backed smart home company. Tim was Head of Strategy at Nest Labs, a unit of Google / Alphabet (that acquired Revolv), and is an angel investor in 10 startup companies. He is a mentor to award-winning startups and was the winner of the Boulder County Esprit Award Entrepreneur of the Year in 2012.

**Nathan Estrada** is Director of Sales and Market Development at Nymbl Science, a Boulder-based technology company that combines medical science and mobile technology to measure, track and improve balance. Nathan received his Doctor of Physical Therapy (DPT) from the University of Colorado Health Science Center. He is a Physical Therapy Clinical Specialist and Sports Certified Specialist (SCS).

**Jenifer R. Fischer** is a licensed clinical social worker with the Senior Reach® program. She received her B.A. from Miami University in Oxford, Ohio and her MSW from Yeshiva University in New York City before relocating to Parkland, Florida for 25 years. Ms. Fischer began her career in mental health services as a clinician in a variety of settings, including working in psychiatric settings, private practice, academia and eventually leading to a fifteen-year career within a large regional hospital system in its outpatient behavioral health clinic. She moved to Colorado in 2015 and joined the Senior Reach team as one of its two Boulder County clinicians. Jenifer received the Boulder County Elder Abuse Awareness and Prevention Award in 2017.
Shun-Luoi Fong is Director of Communications for Cultivate (formerly Boulder County CareConnect), a Boulder-based nonprofit that helps seniors flourish by reconnecting them—as recipients and contributors—with their surrounding communities. He is also the founder of A Shared Humanity, a design studio and story incubator that helps individuals and organizations grow their impact through the power of shared human experiences. With a diverse background in visual media, design, and tech, Shun-Luoi brings a passion for leveraging a diversity of tools—both online and offline—to build collaborations that contribute to a world as it ought to be. Learn more about Shun-Luoi at https://iam.shunluoifong.com and connect with him on Twitter/Instagram: @shunluoifong.

Adriana Gomez is a Research Analyst at the Colorado Health Institute. In this role, she analyzes and researches health policy issues in Colorado. She assists in creating research publications, reports, and blogs on health policy issues and data. Adriana recently graduated from the University of Colorado Denver with a bachelor of arts in public health with a minor in political science. She has been with CHI since September 2018.

Amanda Goodenow, MS, OTR/L, is Program Manager for Colorado Visiting Nurses Association’s CAPABLE program. Amanda joined Colorado VNA in 2011 as a staff Occupational Therapist. In 2017 she took on a leadership role as the CAPABLE Program Manager, overseeing the program’s clinical operations including a team of two RNs and one OT, Habitat for Humanity partnership, evaluation, outreach and visibility strategies, and helping design the program’s growth strategy. Amanda began her practice more than a decade ago in acute care in Topeka, Kansas following a master’s degree from University of Central Arkansas.
**Grace Hanover** is the new Colorado State Director for Older Adults Technology Services (OATS), an organization harnessing technology to transform the way we age. Grace's career is focused on creating and sharing meaningful content. Prior to joining OATS, she served as the Communications Director for Mike Johnston’s 2018 gubernatorial campaign, using technology to spread his unifying message across the state. Before that, Grace spent six years leading content strategy at Denver’s homegrown startup, Craftsy – a company that pioneered best-in-class digital learning for millions of creative (and older!) adults. Born and raised in Boulder, Colorado, Grace graduated from Harvard College with a degree in History & Literature.

**Keith Hughes** is Founder & CEO of Inhabitech, LLC based in Longmont, Colorado. Keith has been programming computers since 1970, and most recently created responsive physical spaces as a programmer at Google. He has watched family members care for other family members and wants to create and deliver truly intelligent smart home technology that will help older adults lead longer, healthier lives, living where they wish and supporting caregivers through difficult times.

**Emily Johnson** is a director at the Colorado Health Institute. In this role, she conducts financial modeling and other types of quantitative analysis on health policy proposals. She studies how both local and federal proposals could impact Colorado, its budget, and its residents. Emily holds a masters in health services research from the University of Colorado and has been with CHI since 2015.
Dr. Brian Kaskie, PhD, is Associate Professor in Health Management and Policy, and Associate Director of Public Policy for the Center on Aging at the University of Iowa. Dr. Kaskie earned his master’s at Washington University in St Louis and completed his doctoral training at the University of Southern California Leonard Davis School of Gerontology. Dr. Kaskie served an APSA Congressional Fellow, assigned to the Majority Staff of the Senate Aging Committee chaired by Senator Susan M. Collins. Dr. Kaskie’s primary interest concerns the intersection between public policies and older persons, and he has a history of contributing directly to the formulation and implementation of public policies concerning older adults. His research involves analyzing Medicare and Medicaid policies, empirically testing models of state policy formation and implementation, and translating integrated approaches to providing geriatric care in a variety of healthcare settings. Most recently, Dr Kaskie has examined the increasing use of cannabis among older persons here in Colorado, evaluating the implications for opioid abuse and end of life care through a state-funded study.

Chris Lee is President and CEO of the Colorado Visiting Nurses Association (VNA). Chris joined Colorado VNA in May of 2015 and has widespread experience in home health and healthcare administration. His expertise includes mergers and acquisitions, business development, electronic medical record implementation, and Lean performance improvement and operations management. Most recently, Lee served as the General Manager of SCL Health Solutions, LLC, SCL Health’s home health service line. Chris serves on several boards and committees including the Edmundite Southern Missions and Colorado Strategic Action Planning Group on Aging (SAPGA). While part of Exempla Healthcare, Chris held leadership positions including serving on the team that opened Good Samaritan Medical Center. Chris holds a Bachelor of Science in business administration with a minor in computer science from St. Michael’s College.

Jill Lindgren is Co-Founder and CEO of eLivelihood, a platform that helps families care for their aging parents by putting everything they need in one place. Jill has been the primary caregiver for her father for the last 20 years while he has lived in her home. She understands firsthand the issues that come with being the primary caregiver and how that affects the family dynamic with siblings, children and spouses. She founded eLivelihood to not only help her own family, but to help others that care for a loved one. She has spent the last 18 years as a consultant working in Engineering, Business Development and Project Management. Her focus has been on helping companies develop operational strategies, documenting new policies and procedures and streamlining operations to improve cash flow. Jill attended the University of Iowa and has a bachelor’s degree in Business Administration. She also has her PMP certification, Six Sigma and ITIL.
**Dr. David E. McCarty**, MD, FAASM, is the Medical Director of the Colorado Sleep Institute. He is a board-certified internist and is both fellowship-trained & board-certified in Sleep Medicine. Having devoted his practice to Sleep Medicine full-time, he joined the Colorado Sleep Institute in 2015. Dr. McCarty graduated from medical school at Duke University, and completed his Internal Medicine residency at Harvard’s Massachusetts General Hospital in Boston. He practiced primary care internal medicine for several years, during which time he noticed a consistent overlap between sleep disorders and the medical disorders that troubled many of his patients. Dr. McCarty’s academic accomplishments include numerous papers published in peer-reviewed literature, several teaching awards, and original research presented at regional and national meetings. Dr. McCarty is an active member in the American Academy of Sleep Medicine and the Colorado Medical Society, and he is a distinguished Fellow in the American Academy of Sleep Medicine.

**Kari Middleton**, PhD, coordinates the Respite & Companion Volunteer Program for the Boulder County Area Agency on Aging. This program matches volunteer visitors with older adults to help alleviate isolation for these older adults, while also providing respite for family caregivers. Kari is a board member of the National Association of Volunteer Programs in Local Government, and presented on volunteerism in aging services at the 2018 National Association of Area Agencies on Aging Conference & Tradeshow.

**Lindsay Parsons** is the Aging Policy Advocate and Planner for the Boulder County Area Agency on Aging. In this role, Lindsay creates and maintains partnerships with local councils, service providers, and other community agencies; and coordinates the ongoing implementation of the countywide strategic plan for aging well. She has worked in public health and human services for 10 years. She has served both government and nonprofit entities. Lindsay has a strong background in public health, community and partnership development, communications, strategic planning, and social research. Lindsay earned a Master of Public Health degree with an emphasis in Health Promotion and Policy from the University of Missouri.
Elise Reinhard, MD, specializes in geriatric internal medicine with Boulder Medical Center. She comes to Boulder from Tucson, Arizona, where she was assistant professor of medicine at the University of Arizona Health Network/Banner University Medical Center. She also served as medical director of the University of Arizona’s Acute Care of the Elderly Unit. Dr. Reinhard earned her MD from Drexel University and completed her residency at the University of Arizona.

Sarah Schoeder, LPN, is Wellness Director at Eaton Senior Communities. Sarah joined Eaton Senior Communities in 2013. She has a long history of service to the geriatric community, including 20 years as an LPN in a skilled nursing facility in North Dakota. More recently, Sarah served as clinical support at a local PACE program. She enjoys serving the nonprofit sector, helping seniors maintain their independence. Sarah graduated from North Dakota School of Science and Red Rocks Community College in Lakewood. In 2017, she was the co-recipient of the Robert Wood Johnson Foundation Award for Health Equity through LeadingAge. In 2018 she was co-recipient of the Lakewood Community Sustainably Award for her contribution to Cycling Without Age. Sarah serves on the Senior Reach Advisory Board, The Jefferson County Adult Protective Services Review Board, the PIMA Medical Services Advisory Board, and the Jefferson Council on Aging.

Deborah Skovron is Director, Creative Director, and Co-Founder of CircleTalk, a program created to address the need to disrupt loneliness and isolation in the lives of older adults. Deborah has extensive experience in group dynamics and project management. For the last 30 years, she has served as Executive Director of the Society for Creative Aging as well as in numerous management consultant roles for non-profit organizations serving at-risk populations. Deborah’s work focuses upon building capacity in people and pioneering new concepts that have powerful social impact.
Janine Vanderburg launched her encore career in 2018, after three decades of leading Joining Vision and Action, the consulting firm she started in 1987 that has helped thousands of individuals and organizations involved in “community and social change”. Her new venture, Encore Roadmap, helps older adults develop social purpose businesses, advocates for age-friendly entrepreneurial policies, connects those entering the social sector with encore mentors, and helps to change the narrative about older people and the economy. A certified FrameWorks Institute master trainer in Reframing Aging, she is currently launching and directing Change the Narrative in Colorado, a statewide strategic communications campaign funded by NextFifty Initiative and Rose Community Foundation, to shift public perceptions about aging and ageism.
Welcome, Elderberry Award, and Keynote Address

Full Auditorium

Welcome & Introduction
Jacob Bielecki & Lindsay Parsons, Boulder County Area Agency on Aging

A Word from Our Partner Sponsor
Dr. Carolyn Fronczak, MD, MS, Boulder Medical Center

2018 Elderberry Award
Kellie Hudson, President, Aging Services Foundation of Boulder County

The Aging Services Foundation of Boulder County is a local independent nonprofit that works to raise and distribute funds that enhance services for and the lives of older adults and family caregivers. For many years, the Aging Services Foundation has recognized the work of extraordinary groups and individuals making a difference in the lives of older adults, family caregivers, and the professional community with the Elderberry Award. This year's Elderberry Award goes to Sherry Leach, Manager of the Boulder County Area Agency on Aging. Sherry will be retiring this month.

Opening Keynote Address: Reframing Aging
Marisa Gerstein Pineau, PhD; FrameWorks Institute

The way most people currently think and talk about aging impedes transformative policy, misguides product and service design, and limits innovation. How can we better understand and encourage better understandings of aging and ageism? How can we paint a different picture of what it means to “age” in society today – one that is truer to the strengths, experiences, and value we contribute throughout our lifespans?

Enter FrameWorks Institute. Funded by a large cohort of the country’s largest national aging organizations, FrameWorks has launched the Reframing Aging Project, a research-based initiative to understand how and why people think about aging in certain ways, and to develop communications solutions and strategies to increase public awareness of, support for, and interest in policies, practices, services, and products that reflect a more age-positive and integrated society.

Dr. Gerstein Pineau will review FrameWorks’ research, findings, and experiences to reveal how aging is misunderstood in America, and how we can begin to reframe – and maybe even revolutionize – aging.
10:45 AM – 12:00 PM

Older Coloradans and Marijuana: A Public Health Problem or Policy Alternative?

Presenter: Brian Kaskie, PhD

Based on data collected from more than 50 focus groups and nearly 600 survey responses from older adults across Colorado, Dr. Kaskie will present information about the growing intersection between older adults and cannabis. His findings, generated from one of the largest state-funded studies of older adults and marijuana use in the US, will highlight attitudes among people who use and do not use cannabis, and then focus on the experiences and outcomes of those older adults who do use cannabis for medical and/or recreational purposes. The presentation will conclude with a discussion focusing on the role of healthcare providers, the aging network, and public officials.

12:00 PM – 1:00 PM | Lunch

1:00 – 2:15 PM

Good Zzzz’s: A Discussion About Sleep, What Can Go Wrong, and How to Make it Right

Presenter: Dr. David E. McCarty, MD, FAASM

If your average night’s sleep is eight hours (one third of a day), you sleep for one third of your life. If you live 75 years, that’s 25 years of sleep (or 9,125 days). This session is a discussion about the basic mechanics of sleep. Dr. McCarty will introduce several ways in which sleep can go “wrong”, including sleep apnea, restless legs syndrome, and insomnia. He will discuss current and emerging research, and offer solutions on ways in which we (and our clients) can improve the quality of our sleep as we age.

2:30 – 3:45 PM

Innovations in Home-Based Care

Presenters: Amanda Goodenow, Chris Lee, Melanie Plaksin

New models of home-based care are emerging that are proving to be more effective, person-centered, and economical. Two Colorado organizations will present on their models of in-home care: The Colorado Visiting Nurses Association will present their CAPABLE (Community Aging in Place – Advancing Better Living for Elders) program, based on a model developed by Johns Hopkins University School of Nursing that brings an occupational therapist, a nurse, and a basic home modification service together to promote independence and longevity in the home. DispatchHealth will present their model: an urgent care setting on four wheels. After receiving a call from a patient, DispatchHealth will review their symptoms to better understand the issue, and send a medical team out to the individual’s home. Both organizations will also speak to what they are seeing in the field, and provide some insights into the directions this type of work is going.
10:45 AM – 12:00 PM
Local Trends in Aging
*Presenters: Adriana Gomez, Emily Johnson, Lindsay Parsons*

What are older adults experiencing across Boulder County and Colorado? Who are the most vulnerable? Spend a session with the Boulder County Area Agency on Aging and Colorado Health Institute and gain some immediate insights into the many realities of aging in our communities. Qualitative and quantitative data from the latest demographer’s reports, Community Assessment Survey of Older Adults (CASOA), Age Well Community Conversations, and Aging Vulnerability Index will paint a clearer picture of the diverse living situations and experiences of older adults in our communities.

12:00 PM – 1:00 PM | Lunch

1:00 – 2:15 PM
Telling the Story
*Presenters: Shun-Luo Fong, Marisa Gerstein Pineau, Janine Vanderburg*

Quite a lot is happening in communications in the aging field right now. As organizations shift to meeting growing demands of the Boomer generation, tastes, expectations, and preferences among clients, consumers, and patients are evolving. What’s in a name? What words are we using? What does our content look like, and how does it resonate with our intended audiences? This session will unpack communications beyond the morning keynote, to explore images and language, how to connect stories to broader issues, how to become more strategic and intentional, and ways in which organizational and institutional changes can be realized. The format of this session is a dialogue, and audience participation is encouraged.

2:30 – 3:45 PM
Understanding and Addressing Social Isolation
*Presenters: Jenifer Fischer; Kari Middleton; Elise Reinhard, MD
Moderator: Deborah Skovron*

Social isolation is gaining attention as an overlooked, understudied, and hidden social determinant of health. The moderator and panelists for this session, representing different fields and backgrounds, will together explore how social isolation can be better understood, identified, and potentially addressed. The format of this session is a dialogue, and audience participation is encouraged.
Tech & Innovation: South Auditorium

10:45 AM – 12:00 PM
Gerontechnology: A Market Overview
Presenter: Karen Brown

Hear from one of Colorado’s savviest “gerontechnologists” about the latest on technology and aging in Colorado and the US. Learn about our local Aging 2.0 group, and the resources, opportunities, and events available to connect with innovators, startups, and entrepreneurs who are designing and developing new solutions for aging services and healthcare professionals, older adults, and family caregivers.

12:00 PM – 1:00 PM | Lunch

1:00 – 1:20 PM
Innovator’s Showcase #1: Misty Robotics
Presenter: Tim Enwall

See what made one of the 2018 Consumer Electronics Show’s biggest splashes – the Misty II. Based in Boulder, Misty Robotics is working on building the robot that may one day be serving you lunch. Misty Robotics’ vision is to put a personal robot in every home and office – to be seen and treated as friends, teammates, and maybe even families – performing helpful tasks, providing safety, and interacting with humans in entertaining and friendly ways. See how Misty is taking baby steps today toward this vision.

1:30 – 1:50 PM
Innovator’s Showcase #2: Nymbl Science
Presenter: Nathan Estrada, DPT, SCS

You may have heard a recent segment on Colorado Public Radio featuring the founder of this product, talking about scaling up efforts to reduce falls among older adults. Nymbl Science combines medical science and mobile technology to measure, track, and improve balance through a combination of balance assessments, balance trainings, and quizzes to improve brain plasticity.

1:55 – 2:15 PM
Innovator’s Showcase #3: Inhabittech
Presenter: Keith Hughes

What if your home was a partner in your health and the health of your aging family members? Inhabittech’s goal is to give caregivers peace of mind about their loved one’s day-to-day wellbeing and quality of life, by making their smart home more aware of their health. Come learn about how a former Google programmer is designing a revolutionary solution that will transform our living environments into critical members of our care teams.

Continued on next page
Tech & Innovation: South Auditorium

2:30 – 2:50 PM
Innovator’s Showcase #4: Robotic Companion Pets in Long Term Care
Presenter: Sarah Shoeder

Come meet – and pet – toy company Hasbro’s Joy for All brand robotic dog and cat, and learn how Eaton Senior Living is introducing these fuzzy mechanic critters to comfort and accompany older adults.

2:55 – 3:15 PM
Innovator’s Showcase #5: eLivelihood
Presenter: Jill Lindgren

When a family shares the multitude of finances and roles when caring for a loved one, it can be challenging to keep track of it all. Here’s one Colorado-grown solution: eLivelihood – a collaborative app that helps families manage care and finances, and monitor the health, of their aging parents. Hear from the Co-Founder and CEO about how eLivelihood is alleviating some of the stress of caregiving.

3:20 – 3:40 PM
Innovator’s Showcase #6: Senior Planet Colorado / Older Adults Technology Services (OATS)
Presenter: Grace Hanover

Thanks to a substantial grant from NextFifty Initiative, New York City-based Older Adults Technology Services (OATS) is bringing its innovative Senior Planet model to Colorado. The Senior Planet model includes in-person technology classes, designing a tech-centered community space, and connecting rural and homebound Coloradans with digital tools. Come meet the new State Director of Senior Planet Colorado, and hear what is in store for this exciting new statewide endeavor.
Closing Keynote Address
Full Auditorium

4:00 – 4:30 PM

The Future of Aging in Colorado
Wade Buchanan, Senior Advisor on Aging
Governor John Hickenlooper’s Office

With growing public and private resources and collaborations devoted to aging services and solutions, Colorado is poised to become a more “age-friendly” state. How might we help make this happen? How can we better influence and integrate across sectors and industries? Meet Colorado’s first Governor-appointed Senior Advisor on Aging and learn about ways in which Colorado’s public and private sectors are driving innovations and solutions to meet growing demand through strategic partnerships, policy and planning, funding and philanthropy, technology, and more.
